

**ILARIA DE SANTO – Schlumberger**

Based in Paris, Ilaria is Surface Logging Global Product Manager for Schlumberger. She joined Schlumberger in 1998 and has worked in different roles in Italy, France, Algeria, Nigeria, UK and USA. After an extensive experience in the Wireline Formation Testing business, she is worldwide responsible for the Schlumberger surface logging business. Ilaria holds an MSc degree in Geology from University of Pavia (IT), an MSc degree in Petroleum Engineering from Heriot-Watt University (Edinburgh, UK), a Global Executive MBA at Bocconi School of Management (Milan, IT), a Music Degree in Piano and a Music Degree in Harpsichord. She has co-authored 32 technical papers for major professional societies and 5 patents. Additionally, she was awarded several Gold and CEO & Schlumberger President Awards, as well as an SPE Formation Evaluation Regional Award (North Sea). She has been invited to chair several technical sessions at SPE, SPWLA and AAPG international events around the world. Ilaria has been nominated SPE Distinguished Lecturer for the 2019-2020 cohort.
