

Elettricità Futura is the leading Association of companies operating in the Italian electricity sector, representing over 70% of electricity produced and sold in Italy. More than 500 large, medium and small enterprises active in the entire supply chain (traditional and RES generation, retail, distribution, services, trading) have chosen Elettricità Futura to expand their business perspective. The Association represents companies with 40,000 employees, 75,000 MW of installed electrical power, 1,150,000 km of distribution lines. Elettricità Futura support companies belonging to the electricity sector and give them visibility. The Association gives weight to its members' interests and pursue them with a targeted and solid action of advocacy. Moreover, Elettricità Futura help companies to find new business opportunities in the electricity market, in B2B relations, in the innovation network. Elettricità Futura is member of Confindustria, Confindustria Energia and participates in the European debate through membership in various European associations representing the sector. <https://www.elettricitafutura.it/>
