

"Clean and Affordable Energy for a Sustainable World"

SAVE THE DATE:

17 June 2021 - H 15.00-16.30

WEBINAR BY

OMC

Introduction and Moderation:

Monica Spada, Chair OMC 2021 – Edoardo Dellarole, Chair Programme Committee

Energy transition is the key towards transformation of the global energy sector to zero-carbon by the second half of this century.

To achieve a clean transformation and limit climate change energy-related CO2 emissions must be abated. On the other hand, transition has to be tested on affordability in order to grant access to energy to everyone at a decent cost.

For sure, energy transition will be enabled by smart technologies, digital evolution, policy and market frameworks, and above all, by a new way of thinking and act, toward a holistic and synergic shared view.

Invited speakers:

Stefano Campanari
Polytechnic University
of Milano

Andrea Contin
University of Bologna,
Ravenna Campus

Francesca Verga
Polytechnic University
of Torino

*Closing remarks and launch of OMC 2021
Energy Hackathon - organized in alliance with
SPE Italian Section and with the support of
Accenture*

Paolo Carnevale
Chairman
Spe Italian Section

accenture

Fausto Torri
Managing Director Energy Industry
Accenture
