## EPISODE 1

# “Transition Path in the Mediterranean Area in a post Covid-Environment”

### CHAIRPERSON:

Manfred  
Hafner

Professor  
FEEM and  
Johns Hopkins  
University

### PANELISTS:

Rabia  
Ferroukhi

IRENA  
Director of the  
Knowledge,  
Policy and  
Finance division

Enrico  
Granara

Ministry of Foreign  
Affairs  
Plenipotentiary  
Minister, Coordinator  
of Euro-  
Mediterranean  
Affairs

Ali  
Hached

SONATRACH  
Advisor to the  
Chairman&CEO

Roberto  
Cimino

Technology  
Cluster  
Blue Italian  
Growth  
Chairman

## EPIISODE 1

### “Transition Path in the Mediterranean Area in a post Covid-Environment”

The REM 2020 opening session focused on the new strategies applied by energy companies in the post-covid phase.

The urgent need to boost the transition towards a decarbonized sustainable future calls for a portfolio of solutions able to promote medium-term sustainability with the necessary restructuring of the whole energy system with important impacts on the energy industry.

## EPISODE 2

### “Targeting Zero Emissions: new energy products and environmental solutions”

#### CHAIRPERSON:

Giambattista  
De Ghetto

Professor  
Polytechnic Milan

#### PANELISTS:

Patrick  
Monino

Eni New Energy  
Chief Executive  
Officer

Federico  
Colombara

Boston Consulting  
Group  
Partner and  
Associate Director

Gaetano  
Iaquaniello

Nextchem  
Chairman

Ben  
Tze Kek

Net Zero Teesside  
Deputy Project  
Director

## EPISODE 2

### “Targeting Zero Emissions: new energy products and environmental solutions”

This live session offered an **overview** on the available technology solutions for **capturing CO2** and for **boosting reuse and circular economy** to **achieve zero emissions**. Innovation is the key to start re-positioning energy, pushing forward **carbon neutrality** and **gas valorization practices** while developing **clean energy sources** as a whole process to deliver solutions for a sustainable low-emissions future.

## EPISODE 3

# “New Strategic Priorities for the Energy Industry in a post Covid Environment”

### CHAIRPERSON:

Liv  
Hovem

DNV GL  
Chief Executive  
Officer Oil & Gas

### PANELISTS:

Robert C.  
Armstrong

MIT- Massachusetts  
Institute of  
Technology  
Director Energy  
Initiative

Fabrizio  
Botta

Saipem  
Director, Global  
Strategy,  
Commercial and  
Tendering – E&C  
Onshore Division

Michele  
Stangarone

Baker Hughes  
Vice President Europe,  
Russia CIS, SSA and  
President of Nuovo  
Pignone

## EPISODE 3

### “New Strategic Priorities for the Energy Industry in a post Covid Environment”

The world witnessed a turbulent start of the 2020's with the impacts of a global pandemic and volatile oil price that placed extraordinary demand on leaders and businesses.

How are companies transforming the way they operate after this year experience to create economic value?

We discussed about **perspectives** and **challenges** to overcome the downturn and grow sustainably in the long term together with our distinguished guests.

Alessandro  
Lanza

FEEM  
Executive  
Director

Filomena  
Maggino

Prime Minister Office  
Italian Government  
Counsellor on Quality  
of Life  
and Sustainable  
Development Issues

## EPIISODE 4

### “Energy Transition post Pandemic and looking ahead”

How will the industries involved change their paths after the Pandemic? What should we do to rethink the Energy Transition in the near future?

We discussed about **perspectives** and **challenges** to overcome the downturn and grow sustainably in the long term together with our speakers, and found out some interesting clues with our distinguished guests.

Advisor

”

### RETHINKING ENERGY TOGETHER ALLIANCES FOR A SUSTAINABLE ENERGY FUTURE

”

In over 25 years OMC has grown into a **key event in the Mediterranean region for energy insights** with particular emphasis on the upstream sector.

Today the energy transition challenge, coupled with the recent pandemic turbulence and the impact of oil price volatility, are urging us to expand the event horizon.

In recent years the oil & gas has made a significant **step towards a low carbon energy mix**, massively investing in **technologies to adapt to energy transition**, as well as adopting strategies and **new business models** that aim at combining economic with environmental and social sustainability

As the pathway to energy transition is set and irreversible, we are all stimulated to **enlarge the scope of the OMC event by taking in all forms of energy**, looking deeper into issues like decarbonization, renewables and circular economy.
